

Challenging conditions? XPK-HF C-Pro can handle them!

XPK-HF C-Pro is made for challenging conditions!

XPK-HF C-Pro is a 1 kV halogen-free flame-retardant power cable for fixed indoor and outdoor installations. The cable is suitable for building installations, residential construction, industrial installations, and data centres. The cable meets fire performance Cca-s1,d1,a1 and is suitable for use in buildings with a high fire risk. In the event of fire, smoke generation is low and transparent which facilitates evacuation; smoke is also not harmful to electronic equipment.

Main features and advantages:

- suitable for all building types in Estonia
- multipurpose indoor and outdoor cable
- good UV resistance
- minimum installation temperature -15°C
- maximum conductor temperature 90°C
- smooth surface for quick installation
- safe to use with standard installations tools
- easy to strip
- conductor resistance according to EN norms
- CPR Cca-s1,d1,a1; DoP nr 1015210
